

INTERNATIONAL PROPERTY TAX INSTITUTE

A world of experience...

"This is an accessible and stimulating book relating to the application of academic ideas from the fields of geostatistics and spatial econometrics to the world of computer-assisted mass appraisal of residential property for property tax purposes. Both practitioners and academics will benefit from it." Robert C. Denne, Partner, Almy, Gloudemans, Jacobs & Denne

"In valuation/appraisal literature, one of the biggest problems to overcome concerns the gap between detailed and general level analysis. This book represents the most rigorous attempt to date to tackle this problem." Dr. Tom J. Kauko, Associate Professor, Department of Geography, Norwegian University of Science and Technology

Improving Mass Appraisal Valuation Models Using Spatio-Temporal Methods

Richard Borst, Ph.D

Richard A. Borst, PhD is one of the world's leading authorities on the development and use of computer assisted mass appraisal, automated valuation models and in particular, the application of geostatistical methods.

The International Property Tax Institute (IPTI), is a not-for-profit organization, widely recognized as the world's leading organization on property tax policy and practice.

Both have come together to offer CAMA/AVM practitioners this important and practical book which *"helps bridge the gap between the vitally important task of mass appraisal and many of the techniques developed elsewhere for spatial and spatio-temporal data"*.

R. Kelly Pace, Professor, Department of Finance, Louisiana State University.
